

1 MS. ANDERSON: My name is Diane Anderson.
2 Do you want my address? I live on the North Shore of
3 Oahu, and I arrived here today with my mind pretty
4 much already set up with really, really concerns about
5 where our species, our human species is going to draw
6 the line to impact the marine world, mammals in
7 particular. And I just find that it just seems in our
8 world escalating and escalating and escalating, and I
9 believe our human species can do better, much better.
10 So I do not support active -- when I read the numbers
11 of the impact that the Navy is predicting, I am
12 horrified, just horrified. That's not very much to
13 say, except for that I'm here in person to say it.
14 Thank you.
