

14 KARIN DAMERON: Thanks for the opportunity
15 to speak. My name is Karin Dameron. It's not
16 acceptable to the have detrimental impact on the ocean
17 and all its contents so that military people can be
18 trained and munitions can be tested. No level of
19 displacement, harm or death of marine life is
20 acceptable.

21 We as a nation could be pursuing peace and
22 preservation. The billions of dollars spent on building
23 an offense or a defense is a waste of our planet's
24 resources and is a detriment to our livelihood and
25 planet.

1 A blanket EIS to cover whatever harm the Navy
2 may impose is not legal or acceptable. We have many
3 things that the Navy could be cleaning up with the
4 billion of dollars that are being spent. Thank you.
5 (Applause.)
