

12 ED KAIWI: Aloha, my name is Ed Kaiwi. I
13 was formally in the United States Marine Corps, Echo
14 Company, Second Battalion. So I talked to this lady
15 here, and she told me all about the Navy. Why are we
16 trying to chase the Navy out of here? I just want the
17 Navy to remove the sonar from all military ships within
18 300 miles within our sights.

19 So I want to give this to the captain. This is
20 a handbook. It says, Consultant with Native Hawaiian
21 Organizations in Section 106, review process handling.
22 So the Navy has to go through procedures with the Native
23 Hawaiian Historical Preservation Officer, which I am.
24 And then Sheryl Lovell is the other historical
25 preservation officer for the Office of Hawaiian Affairs.
1 So I represent the Office of Hawaiian Affairs and the
2 Department of the Interior.

3 So these policies and procedures things that
4 I'm going to have Scott read after me identifying the
5 historical properties. So the Navy hasn't identified
6 what area, like the lady said, that they're going to
7 test this thing.

8 And now the whole northern islands is a
9 sanctuary. So no military ships supposed to be in the
10 sanctuary. So right now the Navy is violating any rules
11 by bringing any military ship within the sanctuary area,
12 which is the Pacific Missile Range.

13 So the other one is adverse effect on it, and
14 then there's how to resolve the adverse effect. What is
15 the implementation of the MOA? The memorandum of
16 agreement is what we need to sit down with the Navy and
17 the historical preservation officer and the state
18 preservation officer before anyone can proceed in

19 whatever you're doing today.

20 And the last part is charter Native Hawaiians
21 and the public, so the public informant is the key
22 ingredients in sufficient Sections 106 consulting, and
23 the views of the public should be listed and considered
24 throughout the whole entire process.

25 So I'm a Native Hawaiian, and these are the
1 public. And so the public and us are complaining about
2 the sonar that you guys destroy it. You have called the
3 mermaids aquatic eighth. So anyway, my time is up. And
4 he can read the rest of this to you and follow the
5 policies and procedures of the federal government before
6 you even start to bring EIS in our waters. They're not
7 allowed here and please follow the instructions. Let
8 that be known the procedures and policies of the
9 military. So do I. (Applause.)
