

18 WENDY RAEBECK: Aloha, I guess I'm last.
19 So I just want to say that personally I'm not against
20 anybody, and I know that all the people who work in the
21 Navy are fine people and that living here on Kauai that
22 you know as well as all of us what we have. So I just
23 would like to suggest that in the position that you're
24 in if you could instead of, you know, going back and
25 going, Oh, well, we went there and we listened to all
1 those people; to just take it to heart what the people
2 have said and maybe see what you can do in your position
3 to support the stuff that we all love about Kauai and
4 to, you know, instead of just taking orders and going
5 along. I've got to do this because this is my job. To
6 see what maybe else can happen that can bring us
7 together. Like Puanani said, and that, you know, start
8 focusing and working on a little bit more solution
9 oriented.

10 And also just I'd really like to see the
11 testing be done maybe in-house somewhere. You know, if
12 we can put people on the moon, if we can build all these
13 aircrafts, we can certainly test in such a way that is
14 not harming things, you know.

15 And the last thing is, so the testing, are we
16 preparing to have a war? And so then we're ready for
17 war, so then what? We have a war here?

18 So maybe, I don't know, I'd like us to work
19 together towards something a lot more wholesome.

20 And also, one last thing; sorry; is that I know
21 that you Navy people are in a huge, great position to
22 really know about the oceans. You know a lot more than
23 a lot of us; me, for example. And I'd like to really,
24 my real vision for the Navy is when we live in a world

25 of peace, which we can do, is that our Navy is the
1 absolute leader in everything ecological for the ocean
2 and use the power that we have in the seas to clean the
3 oceans and to preserve and protect the oceans. Thank
4 you for having me. (Applause.)
