**DATE:** July 2, 2012

The extensive EIS as proposed in this report violates the constitutional rights on international, national and native rights and origin in regards to the extension of the continental land boundaries and native species and all items in the sea.

The extension of boundaries from the continental U.S. to and near the Hawaiian archipelago violates international which the U.S. government was a signator to the protection of nations to the 200 mile limit. The U.S. government must cease and desist breaking its own laws.

Although I am a Hawaiian national my American citizenship was foisted on Hawaiian nationals like myself. This proposal violates legal, judicial, international law of compliance and I have no choice but oppose this EIS.

The natural, physical, legal, political and spiritual laws are violated in this report. The rights of native tenant rights such as fishing, water, gathering and access will be violated.
