DAVID WILSON

MR. WILSON: My name is David Wilson. Is this loud enough? Is that loud enough?

Okay. I'm kind of paranoid because -- well, just because of the situation in the world now. I'm just going to say one thing first. Do we know that every 80 minutes, an American vet commits suicide? Now, these wars -- they can talk about the whales, the turtles, okay. But they're not going to just say, "Oh, we didn't know that. Thank you. We'll stop this now." Everything else goes on, but the turtles and the whales are safe? It's just part of the whole -- I'm just saying like we had this sign out there, the legality has replaced morality. You will not -- you will not tell me (inaudible).

Anyway, when I think about the military, I'm sad. My dad was a career Air Force guy, World War II and Korea. He retired as a (inaudible) major. But I wanted to go to West Point as a kid, but I wasn't smart enough of course. So I know all this strategy. My dad taught me all these strategy ideas and all this stuff, and I realize how the military is being used. We think the American military is doing whatever they're ordered. We're all under orders, right? All the way back to who's in charge of the whole thing, we don't know their names.

We're only being used basically to -- one of the things is to depopulate the Muslim world and at the same time kill and maim thousands and thousands of American troops and, you know, people get the post-traumatic syndrome and all this stuff like that.

So I'm just saying the military is not to blame. They're being used, and it's just sad because we cannot get back to the core by talking to a few. (Inaudible) ask what

12 your rank is?

14 MR. WILSON: You're a captain. Okay. Captain,
15 well, you have a lot of responsibility. But I mean even
16 so, I don't even think you're going to say, "Oh, we didn't
17 know that. We'll change it." So I'm just saying whatever.
18 I don't know what I'm saying. It's just depressing to me
19 to be in this position.

20 Anyway, the idea that until we've seen the
21 thing, by next winter, 10 to 20 million tons -- 10 to 20
22 million tons of debris is going to hit the Kona Coast.
23 What are you going to do then? And it's in the air now.
24 There's radiation in the milk in Pennsylvania, in Iowa, the
25 West Coast. I mean this is what's happening, and you can't
1 fight it. You can't shoot it down. You can't sonar it
2 away.

3 And in 30 seconds, I'll just say let's all rely
4 on the Lord. That's what we've got to do because otherwise
5 we (inaudible). Otherwise, what are you going to do? Fix
6 it? Sonar ain't going to fix it. God bless you.
